**"KNOWING
THEIR BEARINGS"**

Will Bring Victory

The superior performance and endurance of American mechanized military equipment will be the deciding factor in the war and a lot of the credit must go to the engineers responsible for its design.

For one thing, they know their bearings—a vitally important requirement. Thus Timken Tapered Roller Bearings are being called on to “keep ’em rolling.”

You, too, will find a thorough knowledge of Timken Bearings one of your most valuable assets when you graduate and join the ranks of practicing engineers.

Begin to get this knowledge now; write for a free copy of the Timken Reference Manual, the tapered roller bearing text book.

THE TIMKEN ROLLER BEARING COMPANY, CANTON, OHIO

TIMKEN
TRADE-MARK REG. U. S. PAT. OFF.
TAPERED ROLLER BEARINGS

Manufacturers of Timken Tapered Roller Bearings for automobiles, motor trucks, railroad cars and locomotives and all kinds of industrial machinery; Timken Alloy Steels and Carbon and Alloy Seamless Tubing; and Timken Rock Bits.

Science Shoulders Arms

What science in the past has done for peacetime America needs no recounting.

But science today tackles a grimmer job. Research now must give America at war the fighting weapons she needs.

That's why Westinghouse Research Engineers—working in one of the world's leading laboratories—are devoting their full time to the nation's defense requirements.

We wish we could tell you about some of the remarkable things they've done already.

We shall—later.

Ever since its inception, Westinghouse has sought out and trained engineering talent, encouraged engineers to develop and work out new ideas, made itself an engineer's company. We're proud of the way our engineers have adapted themselves to creating and producing wartime equipment.

This is a piece of **ZINC ORE**

A LUMP OF ZINC ORE—unattractive, insignificant, commonplace!

But with the light of science shining upon it, let your imagination visualize the reflections which emanate from it!

In defense: on land, on sea, in the air, Zinc is an essential in the construction of ammunition, armament, battleships, airplanes. In industry, Zinc enters vitally into the construction of engines, tools and machinery. In agriculture, Zinc in one form or another protects homes, crops, orchards, animals. In ways almost infinite in variety, Zinc is used to effect economy, increase efficiency, improve safety, augment profits.

It pays to **KNOW** about Zinc. It is essential in defense. In the period of America's greatest industrial development, Zinc has rendered indispensable service; it is reasonable to expect that it will be utilized even more extensively in the greater developments yet to come.

An interesting mine-to-market story of Zinc is told in "The Zinc Industry," a booklet that will be sent free to any teacher or student who asks for it and gives the name of the school with which he is connected.

SWEEPING STEEL WITH A BROOM OF FLAME

SWEEPING over metal structures and structural parts this modern broom of fire prepares metal surfaces for a long-lasting, protective coat of paint. It is the Airco Flame Cleaning Process and removes rust and scale and dehydrates metal surfaces as it cleans. It provides a warm, dry surface conducive to a lasting paint job and assuring a faster one. Flame cleaning is the most effective method yet devised to prepare metal surfaces, new and old, for painting and repainting. Ultimate maintenance costs are lower.

Versatile is the oxyacetylene flame. It provides better and faster ways of making machines, engines, ships and

tanks by shaping thin steel plates or heavy slab forgings and structures with economical ease and with a high degree of accuracy. The oxyacetylene flame hardens steel to any desired degree and depth. It softens steel, or bends it, or straightens it. It removes scale from billets, castings and forgings.

Possibly you are interested in learning more about the machines and apparatus which harness the Airco oxyacetylene flame and put it to work in so many different ways. If so, write for a copy of the pictorial review "Airco in the News" to the Airco Public Relations Department, Room 1656, 60 East 42nd Street, New York, N. Y.
